EWS . Drillstar

The solution for multiple machining

The new EWS-Drillstar offers an intelligent tool arrangement, a tremendous use of the tool cutting length, in spite of a limited total tool diameter. This can be efficiently realized by using the controlled CNC-axes Y-B together with the tool spindle axis of the multitasking machine.

Characteristics

- 3 drill or boring operations without a tool change
- bore dia 16 (5/8") or 20 (3/4") depending on adaptor size
- tool orientation 3x120°, angle of pressure 35°, Y-axis offset
- usable tool length 60 mm, interference Ø 120 mm
- internal or external coolant supply, individual choice

Available for different versions

■ Capto C5	bore Ø 16	5/8"
■ Capto C6	bore Ø 16	5/8"
■ HSK 63 AT	bore Ø 16	5/8"
■ HSK 100 AT	bore Ø 20	3/4"
